Sounds like it's Mobinfo. They have updated versions for you to try...but, again, that's just me guessing...

I only use a handful of addons so I'm not the expert on them...=P but I do use Mobinfo...

=====

I have solved some of the problems with addons -- but not all.

I disabled fubar and monkey quest and that solved some problems..my info box on items in the bags is working again..not sure which addon is doing it but it is working.

I can run basic cartographer with all sub-programs disabled and all is fine, but when I enable the cartographer sub-programs I get a bunch of errors about some .lua files on line 11 (most of the time..sometimes other line number) and being registered twice.

I have no clue how to fix that except to leave all the sub-programs disabled which takes a lot of info off the map.
