Hi, I have a question about these two cameras:

Am I missing something, or is the only advantage to the P2 its WiFi capability?

Nikon Coolpix L1 6.2MP Digital Camera with 5x Optical Zoom  
Nikon Coolpix P2 5.1MP Digital Camera with 3.5x Optical Zoom

From amazon (from J&R), for only a \$10 difference, the L1 has 6.2 mp and 5x zoom, and the P2 has 5.1mp and a 3.5x zoom.

I see their weight and battery types are different.

For taking macro photos of small objects in a controlled setting, is there a difference between these two that I'm missing? Ease of use?

Thank you  
Gwen
