Ray <ray@xxxxxxxxxxxxxxxxxxxxxx>'s wild thoughts were released on Fri, 08 Jun 2007 10:45:11 -0500 bearing the following fruit:

Is there any way to see line numbers in the VB IDE? I don't want to add line numbers to the code, just the ability to see line numbers in the margin so when I'm debugging I can make notes about line number "X"...

(obviously I'm aware the numbers would be dynamic as the code changes, but effectively I'm looking for something that would be found in Notepad++ or even the latest version of the VB.NET IDE.)

The line number should be displayed on your toolbar.
