I undid your insertion of someone else's name and email address.

The

God!  
How  
does  
Apple  
do  
it?  
A  
brand  
new  
OS  
every  
month.

Sandman:  
It's pretty  
amazing.

What's MS  
interval? A  
patch every  
six years?  
Yeah, that's  
about it.  
You're still  
waiting for  
that brand  
new  
os. :P

Is it a good idea to answer a  
foolish statement by trying  
to make an  
even more foolish one?

Yeah, how's that working out for you?

Have I said something foolish?

Why did you edit my post? Are you trying to tell me you're a  
troll  
who's not worth bothering with?

He didn't edit your post.

What changed my name and email address then? Some strange bug in Mac  
news readers?

The text that with Edwin's name and email address didn't replace any  
text from your post. It was text he \*added\* to his post. That he added  
that text rather than the name "Lurky" along with its associated fake  
email address is his choice.

And I agree with it.

"The iPhone doesn't have a speaker phone" --- "I checked very carefully" ---

"I checked Apple's web pages" --- Edwin on the iPhone

"It is Mac OS X, not BSD." --- 'From Mac OS to BSD Unix.' --- "It's BSD Unix with Apple's APIs and GUI  
on top of it" --- 'nothing but BSD Unix' (Edwin on Mac OS X)

'I claimed nothing about GEM other than it was available software for the

on the timeline of Solaris because it's a different OS.' (Edwin on Sun)
