For what it's worth, the main page has a graphic stating a "New & improved section is coming soon" for classical music.

"New and improved" is a phrase that sends shivers through my system. In my experience, it has nearly always turned out to mean a smaller size for a higher price or an inferior version of an old product. We'll just have to wait and see.

To me, it is an advertising buzzword which means "no change whatsoever" as often as it ever means anything else.
