Hi,

I am trying to get information about internet usage but more specific, social networking websites used in Hong Kong...

1.) Are there popular websites for social networking specific to Hong Kong? Are sites like MySpace, Facebook, Xanga, etc. popular in Hong Kong culture?

2.) Comparing tech savvy places like South Korea (which is the most wired country in the world) or San Francisco, California, how would you say the Hong Kong region compares in terms of people using the internet?

I'm just looking at the general feeling in Hong Kong for social networking via the internet.

Thanks for any help!
