Went about one –and got home at 4–30 very tiring had to go to so many different departments 6 in all and on one of them I left my Handbag !!!panic ! I couldn't remember where i might have left it ! I finally went to the main desk and aske if they could ring some of the places I had been, which they did but it took 20 mins and it was at nearly the last place which was the Blood place and it was there and one of the nurses said not to worry they had been getting things sorted to find me , and brought it to the front desk !!relief.

I am having my op on the 19th at about 10– and having Epidural so will be able to tell you all the Gory details and with a bit of luck should be out in time for festivities !!. Going to Choir tonight helps me to come down a bit, will be a late one cos we got a Concert in another week ;-)))
